

**Energy Division** 

RSTI-CC-58 Raychem screened, separable, coupling system 800 A up to 24 kV

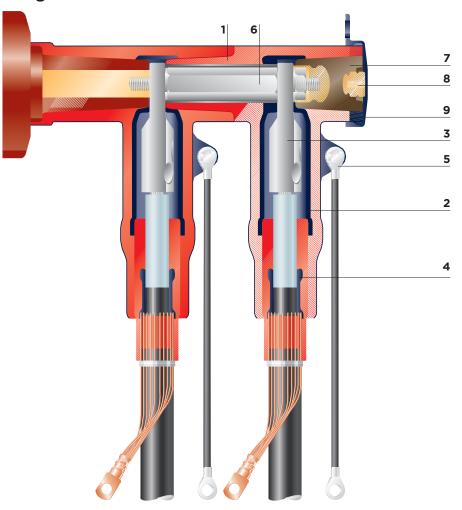

### RSTI-CC-58

#### **Features**

- The screened coupling connector is designed to mate with the rear end of the base screened connector system RSTI-58 designed for 24 kV.
- The insulation of the coupling connector is made of a highly modified silicone rubber characterised by high tracking resistance, elongation at break and nonflammability.
- A thin-walled screen is permanently bonded onto the insulation and protects the connection system against accidental contact.
- The screened coupling connector need not be removed for oversheath testing.
- The combination of screened connector and coupling connector exceeds CENELEC HD 629.1 S2 requirements, which include BS, VDE and other international specifications.
- The combination of screened connector and coupling connector fits 630/1250 A bushings type "C" as specified by EN50180 and EN50181.
- The compact design supports the use of double "T" connections inside standard terminal boxes.
- The wide application range covers cable cross-sections from 25 to 300 mm<sup>2</sup>.
- Conductor connection with mechanical or DIN lugs.
- Easily accessible rear plug with capacitive test point.
- Few accessories required for system test and earth connection.
- Complete kit including lugs for easier installation and storage.

# Raychem screened, separable, coupling system 800 A up to 24 kV

# **Design and construction**

## 1 Screened body

A thin-walled conductive outer screen is permanently bonded to the silicone rubber insulating material of the body.

## 2 Inner screen

A conductive inner layer, as a faraday cage around the compression or mechanical lug, prevents corona at rated voltage.

## 3 Compression or mechanical lugs

Specially designed DIN compression lugs, as well as tinned, mechanical lugs with shear bolts for connecting either aluminium or copper conductor cables.

## 4 Stress cone adapter

Relieves electrical stress at the point where the cable screen is cut. The insulated section, extending beyond the wire shielding, provides a convenient point for oversheath testing.

## 5 Earthing eye and ground lead

Provides a connection point for earthing the screen.

## 6 Threaded pin assembly

A threaded pin assembly together with a washer, spring washer and hex nut ensure high-performance electrical and mechanical contact with the previous installed connector.

# 7 Rear plug with test point

Removable rear plug with capacitive test point.

## 8 Test point

The test point is used to determine whether the circuit is energised; alternatively it can be used for phasing.

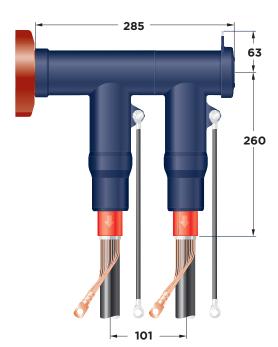

# 9 Conductive end cap

Electrical screen and protection of the rear end of the separable connector.

# **RSTI-CC-58** Applications

## **Double connection**

Material requested for 3 phases: 1 x RSTI-58xx (kits) 1 x RSTI-CC-58xx (coupling connector kit)

## Note:

All applications shown in the brochure need to have a mechanical support meeting the requirements for dynamic short circuit.

# **RSTI-CC-58 Accessories**

# Test rod

Ref. no.:

RSTI-68TR; Length: 310 mm RSTI-68TRL; Length: 460 mm RSTI-68TRA; Kit includes 2 short and 1 long testrod

## **Terminating plug**

Ref. no.: RSTI-56TP

## **Earthing adapter**

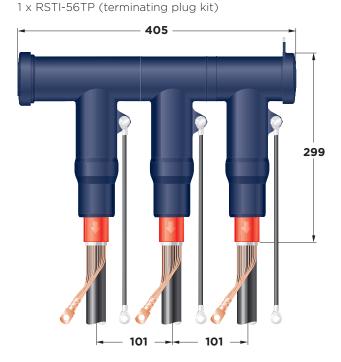

Ref. no.:

RSTI-68EA20; Ball diameter: 20 mm RSTI-68EA25; Ball diameter: 25 mm

## Single core branch off

Material requested for 3 phases: 1 x RSTI-58xx (kits) 2 x RSTI-CC-58xx (coupling connector kit)
